## SKILLS

### FRONTEND

- HTML5 / CSS3
- JavaScript (ES6+)
- TypeScript
- React.js
- Next.js
- Tailwind CSS
- Bootstrap

### BACKEND & PYTHON

- Python
- Flask / FastAPI
- Node.js
- Supabase
- PostgreSQL / SQLite

O G U N D E L E

# Oluwadamilare

ML ENGINEER · FULL-STACK DEVELOPER · WEB DESIGNER

## PROFILE

Results-driven ML Engineer and Full-Stack Developer with a multidisciplinary background spanning biochemistry, education, and software engineering. Adept at designing intelligent systems, building robust web applications, and translating complex data into actionable insights. Combines a deep passion for open-source technology with a commitment to leveraging AI and software to solve real-world problems across Africa and beyond.

## EXPERIENCE

### ● FREELANCE FRONTEND DEVELOPER & PYTHON ENGINEER | 2020 – PRESENT

*Self-Employed · Remote*

Designed and deployed responsive web applications and intelligent backend systems for clients across multiple industries.

- Built responsive web apps using React, HTML5, CSS3 & JavaScript for multi-industry clients.
- Developed backend services & automation in Python (Flask, FastAPI).
- Integrated ML models into production — NLP and computer vision applications.
- Delivered projects via Agile workflows with international clients, on time and within scope.

### ● SECONDARY SCHOOL TEACHER | 2021 – 2023

*Wonderful Heights School, Abeokuta*

- Delivered STEM lessons using modern pedagogy; boosted student comprehension and performance.
- Introduced coding & computer literacy concepts, sparking student interest in technology.
- Monitored progress through continuous assessment and provided targeted academic support.

### ● PRIMARY SCHOOL TEACHER | 2018 – 2020

*The Best Legacy Academy, Owode Yewa*

- Facilitated foundational learning in numeracy, literacy, and basic sciences.
- Created inclusive, activity-based classrooms promoting critical thinking and curiosity.
- Students consistently achieved above-average standardized assessment outcomes.

ML / AI

- Scikit-learn
- TensorFlow / Keras
- PyTorch
- NLP & Computer Vision
- NumPy / Pandas

TOOLS

- Git / GitHub
- Docker (basic)
- Linux / Unix
- Jupyter / Postman

EDUCATION

B.Sc. Biochemistry

Obafemi Awolowo University  
Expected 2026 · Ile-Ife, Nigeria

Machine Learning Engineering

Electric Sheep Africa  
2025 – 2026

Self-Directed Learning

UI/UX Design · Frontend Dev · Branding  
2020 – Present

COMMUNITY

- Community Tech Educator — free coding tutorials for youth in Ile-Ife & Abeokuta
- STEM Outreach Facilitator — school-visit programs for secondary students
- Open-Source Contributor & peer mentor
- OAU Computing & Technology Society member

RESEARCH & INTERESTS

BIOINFORMATICS & ML RESEARCH | 2025 – PRESENT

Obafemi Awolowo University

Pursuing interdisciplinary research at the intersection of biochemistry and machine learning — protein structure prediction and drug discovery pipelines.

NLP FOR AFRICAN LANGUAGES | 2025 – PRESENT

Self-Directed

Building language tools for low-resource African languages — tokenization, text classification, and machine translation tailored to Yoruba and other regional languages.

AI IN EDUCATION / EDTECH | 2025 – PRESENT

Self-Directed

Exploring adaptive learning systems and automated assessment pipelines that can personalise instruction at scale, informed by prior teaching experience.

COMPUTATIONAL DRUG DISCOVERY | 2025 – PRESENT

Self-Directed

Applying molecular docking, virtual screening, and deep learning to accelerate hit identification — extending the biochemistry and ML intersection.
